PERSONAL PROJECTS

My Music App | [Live Demo](#) | [Source Code](#)
MEAN Stack: MongoDB, Express.js, Angular, Node.js

- Orchestrated the integration of the Spotify API to fetch real-time data, including album releases, track previews, and comprehensive artist discographies, enhancing the user experience and engagement within the application.
- Engineered a REST API with Nodejs, MongoDB, and Express with CRUD operations to develop a robust authentication API, ensuring secure user access and data protection, maintaining the integrity of user interactions and preferences.
- Created a responsive Angular application utilizing Bootstrap, ensuring optimal user experience and seamless functionality across various devices, providing an intuitive interface for music exploration.
- Implemented a personalized Favorites feature enabling users to save and access preferred albums and tracks conveniently, enhancing user engagement and retention within the application.

Foodscope Ecommerce App | [Live Demo](#) | [Source Code](#)
Tech Stack: MongoDB, Express.js, Angular, Node.js

- utilizing Node.js and Express for server-side operations and routing, while leveraging HTML/CSS and JavaScript for the frontend interface.
- Engineered a robust shopping cart feature using Express sessions, allowing users to add, modify, and remove items dynamically, resulting in a streamlined and user-friendly shopping experience.
- Established secure user authentication protocols, enhancing website security by implementing encryption and authentication practices to safeguard user data and transactions.
- Developed a responsive and visually appealing frontend using HTML/CSS, ensuring a consistent and optimized user experience across various devices and screen sizes.
- Implemented MongoDB (accessed through Mongoose ODM) for efficient data storage, ensuring seamless product catalog management, order processing, and user information storage.

TECHNICAL SKILLS

Skills: Python, JavaScript, C++, HTML/CSS, JavaScript frameworks (React, Angular), Node.js, Express, MongoDB, Azure, Git,
